

Vessel Data

Basic variables

Ship type

What is the ship type? E.g. 2,500 TEU container ship.

Vessel variables

Vessel: New build or Retrofit

Installed Engine

What is the Make and Type you currently have or have in mind?
E.g. Wartsila 8L46 or MAN 8L50DF.

Installed Engine Power

What is the associated nominal engine power or MCR
(Maximum Continuous Rating) in kW?

Operational days per year

What is the number of days per year (24hr period) spent sailing?
This could also be a percentage (e.g. 50%).

Average power (on LNG)

What is the average engine loading in percentage of MCR?
E.g. 75%.

Bunkering

Bunker location

What is the port or area in which you expect to bunker?

(LSMGO) Benchark Consumption

What is your vessel's current -or expected- annual fuel
consumption in metric tons?

Bunker interval (average)

How many days between bunkering (autonomy) do you require?
