

# Titan LNG signs new customer in Rotterdam

**Tank Services Pernis, the first industrial LNG user in the Netherlands will be supplied by Titan LNG from this February**

**Amsterdam, 28 January 2015.** Titan LNG announces the signing of an LNG supply contract with Tank Service Pernis (TSP). Titan LNG will provide TSP with 11,5 GWh/year of LNG from the **Gate terminal** in Rotterdam. "We are very pleased that Tank Services Pernis has chosen Titan LNG as their LNG supply partner as this is our first client in our home market.", says Niels den Nijs, Titan LNG, commercial director.

**TSP is already equipped with an LNG-plant.** The LNG fires an industrial steam boiler. "LNG enables a pipeline independent and reliable gas supply for us. Compared to our old Heating Oil usage we are reducing our energy costs and emissions significantly, which has a positive influence on the environment", commented Terry de Mello, SHEQ - Manager TSP.

**LNG offers industrial users,** who are not connected to the gas grid and are currently using Heating Oil an economical and clean alternative.

**Tank Service Pernis** is a logistic service provider, specialized in cleaning and repair of food and chemical tank containers. TSP is part of the Belgian Begoos group, which operates on two locations in the Netherlands (Pernis – Groningen).

**Titan LNG** is the leading supplier of full-service LNG solutions to the industrial and shipping sectors in Germany, the Benelux, Austria, and Switzerland. Titan LNG provides full-service solutions: LNG supply, transport, on-site storage tanks and vaporizers.
