

PRESS RELEASE

## Titan LNG Premieres with Fast Bunkering in Rotterdam

*M/V Wes Amelie was bunkered with trucks discharging in parallel*

**Rotterdam, The Netherlands, 3<sup>rd</sup> of November 2017:** Titan LNG has yet again secured a first in the LNG bunkering market. On the 27th of October, Titan LNG bunkered the Wes Amelie chartered by [Unifeeder A/S](#), a retrofitted 1000 TEU container vessel in the Port of Rotterdam with 6 trucks in total discharging 2 trucks simultaneously. This resulted in reduced downtime for the vessel.

Approval for the operation in the Prins Willem Alexanderhaven was obtained after constructive discussions with all stakeholders under supervision of the Port of Rotterdam. Titan LNG successfully illustrated its ability to safely and with zero-venting of methane deliver the LNG with its transfer system that enables two truck to discharge via one bunkering hose.

Michael Schaap, Commercial Director Marine, commented: "We are aiming to use this perfect spot more frequently for bunkering sea going vessels as the quay is suitable and well located for this activity and has sufficient draft."

### **About Titan LNG:**

Titan LNG is a leading full service supplier of LNG to the marine and industrial markets in North West Europe. Titan LNG is part of the IVECO Schouten Group, and a sister company to Rolande LNG, a leading LNG fuelling station operator for road transportation. Titan LNG specializes in providing shipping customers with bespoke, end-to-end LNG solutions, including project planning, supply and delivery, as well as risk management and hedging services to mitigate price fluctuations.
