

Titan LNG and Transafe Sign Safety Training Contract for LNG Bunkering

The nautical crew of Titan LNG, provided by operator AMS, will receive customized LNG bunkering training

Rotterdam, 8th of June 2018: Transafe and Titan LNG signed a long-term crew safety training contract in preparation of Titan's first LNG Ship-to-Ship bunkering operations. Titan LNG's FlexFueller, Europe's first LNG bunkering pontoon, will be operational by the end of this year.

Ronald van Selm, COO of Titan LNG commented, "Safety is paramount to everything we do here at Titan LNG. In order to engrain operational safety in all our nautical crew, we have selected Transafe as our partner for this extensive LNG bunkering safety-training programme. Transafe will contribute to set the industry safety standard for our bunkering pontoons and our other planned LNG bunker barges."

Cristiaan Heuvelman, Managing Director of Transafe: "LNG as a marine fuel is growing fast. We are training more vessel crews on how to work safely with LNG as a fuel. Titan LNG is the first bunker supplier to commit to this high quality programme, showcasing their dedication to safety." The training includes simulations in the brand-new Simwave facility and practical training at the Falck LNG training centre in Rotterdam.

Igor Jansen, director of AMS, the FlexFueller operator and crew provider, added: "With this LNG specific programme we will set the standard in safe LNG bunkering in the ARA region. All crew members will receive extensive training to comply with the International Association of Ports and Harbors regulations."

**About Titan LNG:**

Titan LNG is a leading full service supplier of LNG to the marine and industrial markets in North West Europe. In the marine segment Titan LNG specializes in providing shipping customers with flexible LNG solutions like the T-piece for combined Truck-to-ship bunkering and the FlexFueller LNG Bunkering pontoons for Ship-to Ship supply.

About Transafe, Simwave, and Falck Safety Services:

Transafe, Simwave, and Falck Safety Services work closely together in the field of training and safety management. Transafe has a long experience with LNG on board of vessels and is supported by Simwave for simulator based training and Falck for the firefighting training with real LNG. The combination of these industry leaders creates a unique product overall, which is fully compliant with the International Association of Ports and Harbors and the IGF code.

About AMS:

AMS is a leader in clean inland waterway transport and bunkering operations. AMS has seven vessels under management. It owns the Ecotanker II en III, the first two 100% LNG – electric vessels sailing in the ARA region. Also AMS manages the Amulet, the first diesel-electric inland waterway tanker that won several prizes for its achieved carbon reduction and exhaust gas cleanliness achieved with catalysts.
